Program try to find all available options for this module. All options will be displayed in the window.

Let's find firmware for this DDE module without SA843 (Power reduction): We have:

- 205=Automatic transmission •
- 200=DPF •

select them by green checkbox We don't have:

> 169=EU3 exhaust emissions standard •

823=Hot-climate version • select them by red checkbox We Don't WANT:

 843=Power reduction select them by red checkbox also others options leave as is

Then click <Filter result(s)> and you'll see only one firmware fits for this module with desired options

## www.bmwtools.info

Sometimes it's impossible to determine module by searching in KMM files. In this case you'll see this warning.

You can try alternative searching method. (click <yes>)

Refined module number (searched via HIS file) will be automatically inserted into the green field.

You have to start search again.
